

PRODUCT INSTRUCTION

1. PRODUCT NAME: DL-Methionine

2. CONTENT AND COMPOSITION: C₅H₁₁N₀₂S

3. OBJECTS: Used for all animal species

4. APPEARENCE: White thin crystal or crystalline powder, have characteristic smell, tiny sweet taste, and have optical activity.

4. EFFICIENCY: DL-Methionine is biological protein synthesis skeleton amino acids. DL-Methionine is the necessary growth factors in livestock animal. It can also regulate animal's metabolism. It is already widely used in feed, medicine, food and cosmetics, etc. In the feed industry, the maximum dosage is DL-Methionine. It is used to strengthen feed nutritional. If you add 1kg DL-Methionine in feed, and its nutritional value correspond to 50kg fish powder. DL-Methionine addition was 0.5%—0.2% in the feed. In the medicine area, DL-Methionine is the major element in aminophenol transfusion and compound amino acids. And also can used in synthetic medicinal vitamin. DL-Methionine has anti-fatty liver effects can be used to produce liver drug. In the food area, DL-Methionine is used for food's amino acids and health food processing. And also used as nutrition supplement.

5.RECOMMENDED USE DIRECTIONS: The product should be added to animal feed at normal temperatures.

6. STORAGE: Store in dry conditions in a sealed or closed areas protected from light and heat. avoid any source of combustion.

7. Shelf Life: 60 months

8. ATTENTION: Anti-rain and sunshine

9.PACKAGE: Net 25kg plastic bag

10. Company: Ningxia Unisplendour Tianhua Methionine Co.,Ltd

Address: Central Industrial Park, Zhongwei City, Ningxia, China
