RHINOL - 703

Single Component for Universal Colorants

<u>Composition</u>	Compound of mainly polymeric surfactants.
<u>Specification</u>	Ionic Character - Anionic Solids (NVM) - 35% Density - 1.08 gm / cc
<u>Additional Info</u>	Water Solubility - Clearly Soluble in all proportions Solvents - Nil
<u>Properties</u>	Unique dispersing agent to produce VOC and APE-free universal colorants, for tinting systems as applied to architectural emulsion paints as well as solvent borne alkyd paints. Used as a sole dispersant, also offering humectant and compatibility features. It is specially designed for use for the formulation of universal colorants based on - Oxides & Inorganic Pigments. Possesses three properties in one product i.e. dispersant, humectant, compatibilizer. It is compatible with all waterborne paints.
<u>Dosage</u>	3 to 5% (of total batch formulation) containing Organic Pigments.
<u>Storage</u>	With Caps, Under Cool & Dry Shade Area.
