

# Polyether Polyol YD-360N

Release Date: 2019.04.17

Version: 2.0

## Application

YD-360N is a glycerin initiated polyether polyol with high primary hydroxyl content. It is a high reactivity polyether polyol widely used for producing polyurethane high resilience foam, shoe sole and other applications. The combination with polymer polyol could achieve particular foam load bearing property and better process ability.

## Specification

Appearance	Colorless liquid
Viscosity@25°C (mPa.s)	1000~1400
Colority (APHA)	≤50
Hydroxyl Value (mgKOH/g)	26~29
K <sup>+</sup> (ppm)	≤5
Water Content %	≤ 0.05
Acid Value (mgKOH/g)	≤ 0.1
pH Value	5~7

## Package

We can supply galvanized iron drum, plastic bag, IBC, tank container or car tank for packing and transportation.

## Storage

Protect from atmospheric moisture. Keep container tightly closed and dry. Avoid prolonged exposure to heat and air. The temperature recommended for storage is 15~35°C. For long term storage in tank, nitrogen protection is recommended.

## Shelflife

12 months under proper storage.

## Matters need attention

Please refer to the “material safety data sheet” or follow local laws and regulations.
