

TECHNICAL DATA SHEET

MH-SE301

Modified Starch Ether

Product Description

MH-SE301 starch ether is modified product with high etherification based on Natural plant. It can dissolve in cold water.

Properties

Appearance	white or similar to white powder
Moisture (%)	max. 10.0
PH- value(5% in water)	9.5 ~ 11

Applications

MH-SE301 is a modified starch ether. It can improve consistency, workability and anti-sag of mortar. It is recommended in mortar with cellulose ether together to promote the water-retention. Normal dosage in mortar is 0.03%-0.1% calculated on dry mortar weight.

Package and storage

Packed in paper-plastic bag lined with polyethylene bag, 25 KGS net each.

Storage under dry and clean condition in its original packaging and away from heat.

Health and safety

Please see separate Material Safety Data Sheet
